Why Trans People Need More Visibility

With more visibility comes more understanding. These statistics can and will get better as trans people become more visible in our society.

- 80% of trans students felt unsafe at school because of their gender expression
- 49% of trans people reported physical abuse in a 2007 survey
- 58.7% of gender non-conforming students experienced verbal harassment in the past year because of their gender expression, compared to 29% of their peers
- 50% of trans people have been raped or assaulted by a romantic partner
- 30% of trans women have been incarcerated
- 41% of trans people have attempted suicide

Trans women have a 1 in 12 chance of being murdered...
...or a 1 in 8 chance for a trans woman of color
